## Exhibition Items

### Digital Manufacturing / Solution / Automation

- Digital Factory solution
- Motion Control & Control System
- System Automation, Industrial IT
- Industrial Software, IoT
- Smart sensor, Machine Vision System
- Cooperative robot, AGV, Welding robot, Manufacturing robot
- CAD/CAM/CAE & related systems
- Packaging & Transportation systems
- Pneumatics, Pumps

### Measurement / Test / 3D Technology

- Sensor, Gauge, Temperature controller, Metering & Measuring instrument
- Measuring facility, Precision measuring device, Inspection machine
- 3D Printer, 3D Scanner, 3D Sculpture, 3D Software

### Machine Tool / Injection Molding

- Machine Tools related machine
- Metalworking machinery for Removing, Cutting, Grinding, Finishing
- Laser machine, discharge air machine, Waterjet machine
- Metal sheet working, Cutting, Surface marking machinery
- Rubber & Plastic machinery
- Molding machine, Casting & related machine
- Press, Forging machine
- Surface treatment machine
- Plating and painting equipment
- Aluminium Industry related machine

### Energy / Environment / Safety

- Recycling equipments & Energy conservation device
- Air, Water pollution protection equipments
- Noise, Vibration prevention machine
- Waste treatment equipments
- industrial safety equipment & machine
- Air conditioning, Fan, Refrigerant compressor

### Parts / Components

- General machinery Parts, Precision instrument Parts, Electric & Electronic Parts
- Metal Material, Chemical material, Ceramic material

## 15th Digital Manufacturing Fair

# KOFAS

Recently, the era of the fourth industrial revolution is coming, especially in the machinery industry and throughout the manufacturing industry. In line with this convergence era, KOFAS is also looking to open a new chapter in the exhibition by transforming the name of the 2019 exhibition from the old "Korea Factory Automation System Show" to "Digital Manufacturing Fair KOFAS."

### Digitalization and Production · Manufacturing Exhibition

In the 4th Industrial Revolution era, the manufacturing site continues to innovate beyond the traditional concept of automation to become autonomous and intelligent. With ICT technology, digitalization of production manufacturing through data and solutions is the first step in the evolution.

"Digital Manufacturing Fair KOFAS," a leader in digital innovation, is confident that it will help exhibitors and buyers build networks, introduce technologies and create new markets for exhibitors.

### Korea's Machinery Industry Centre, Gyeongsangnam-do

Gyeongsangnam-do is Korea's largest mechanical industry region, the largest production and consumption site of machinery and parts, and the demand for such industries continues to rise. In particular, the demand for machine tools and digital devices is driving Gyeongsangnam-do to become the No. 1 mechanical industry region in Korea.

In addition, Gyeongsangnam-do and Changwon City provide support for smart innovation in the machinery industry and for manufacturing innovation in the local industry through projects for supplying smart factories.

In an era of change, Gyeongsangnam-do is moving towards digital manufacturing. Create new markets in Digital Manufacturing Fair KOFAS.
